

the
GREAT PUMPKIN
growing tradition

*Pumpkins, pumpkins, varieties of big and small
they grow.
But they interest us not, it's the giants we'll sow.*

*Two weeks after May 27th, Mother Nature's
last frost, at least two seeds to be planted, should
any be lost.*

*Tend to and nurture your gourds' however you
care, but touch another's pumpkin, and weight
yours will lose, to be fair.*

*Come autumn harvest, Tuckamore Homestead
friends will gather and sing, to celebrate and
crown the great pumpkin queen or king.*
